Indochina Countries Cooperative Regulators' Conference in Hanoi

The Indochina regulators conference brought together 24 regulators and credit union representatives from 'economies in transition' to map out regulatory environments that would stimulate growth and sustainability of credit unions. The conference was held on July 29 to 31 in Hanoi, Vietnam in collaboration with the Central People's Credit Fund. Credit union being regulated by the Central Bank is a common characteristic for these countries (Vietnam, Cambodia, Laos and Mongolia); thus, ACCU recognize that they need a platform to share best practices and challenges. The conference is anticipated to bring change to the current legislative and regulatory absences – the second major impediment in advancing the Asian credit union system.

Credit Cooperatives in Mauritius Embrace a Fresh Target - 5% Market Share

ACCU carried out technical mission, for the first time, to Mauritius on June 28-July 4 that included a two days workshop with the cooperative department and consultations with regulators and credit union leaders who showed enormous enthusiasm to develop their movement. The CEO submitted a paper to the Ministry of Industry, Small and Medium Enterprises, Commerce and Cooperatives at the end of his trip providing suggestions on how to achieve their target. The CEO shared sound business practices ACCU had introduced to Asian credit unions such as ACCESS Branding, Competency Courses for Directors and CEOs, Prudential Standards and Stabilization Fund.

In a country of 1.3 million population, 65,000 members of credit cooperatives is about 20% membership penetration. Nevertheless, the Minister of Industry, Small and Medium Enterprises, Commerce and Cooperatives presented a challenge

to savings and credit cooperatives to target for a 5% share in the financial market. Currently, the share of credit cooperative unions (CCUs) is less than 1%.
